WIESE INDUSTRIES

APPLICATION BULLETIN

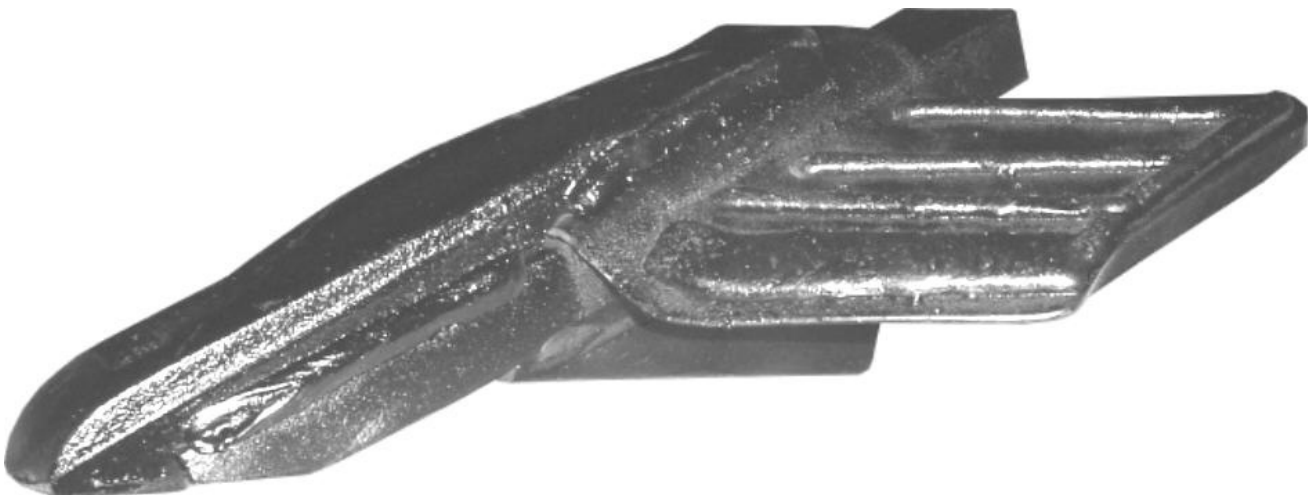

Wiese Industries has discovered that our part # 41BDMI711440 can prematurely fail when used on JD 2700 Mulch Rippers due to the unique configuration of the ripper shanks.

We are recommending discontinuing use on these machines.

41BDMI711440 (right) can still be used on all DMI 1-1/4" shanks and also on JD machines other than the 2700 Mulch Ripper.

Wiese Industries recommends that users of JD 2700 Mulch Rippers install part # 41B2512JDW742 (below). This point is designed specifically for use on all JD 1-1/4" ripper shanks.

We apologize for any inconvenience in application.

Please contact customer service at 1-800-568-4391 for assistance.

Shelf Tag

Fold in half and attach to shelf with points.

Wiese Subsoiler Point

41BDMI711440

For use on DMI 1-1/4" shanks and most JD 1-1/4" ripper shanks.

(Not recommended for JD 2700 Mulch Ripper shanks. Use 41B2512JDW7 instead.)
